Mobile hand washing station
for non-contact cleaning
of hands

NOVALAB – Hygiene to Go (HyGo)

Mobile hand washing station for non-contact cleaning of hands

Excellent protection

Especially in times of the coronavirus, the mobile hand washing station HyGo Mobil offers excellent protection against infections, because an infrared controlled tap ensures that hands can be washed safely and without problems.

The handwashing station is fully mobile thanks to the swiveling, smooth-running wheels and can therefore be used anywhere—no water connection or drainage is even required, as the HyGo Mobil comes with a fresh and a dirty water tank.

The easy-care washbasin made of enamelled steel is durable and can be used for more than 100 washes thanks to the integrated watersaving tap.

Additional accessories such as a soap dispenser, a paper towel dispenser and a paper basket for HyGo Mobil are optionally available.

HyGo advantages

- Wash hands without touching with infrared water tap
- Fixed water connection / drainage is not required
- Integrated 30L tanks for fresh and waste water
- Comfort system with electric fresh water and waste water pump and a hose
- system for easy and convenient drainage of waste water
- Water saving tap for more than 100 wash cycles
- Resistance of the furniture body to high humidity and temporarily higher wetting
- Swiveling, smooth-running solid rubber wheels with brakes
- Lockable base cabinet
- Easy-care washbasin made of enamelled steel
- 230 V plug with 2 m cable
